

## Choestoe Falls RV Park is certified as Wildlife Habitat

The **National Wildlife Association** acknowledged **CFRVP's** commitment to wildlife welfare and designated it as a **Wildlife Habitat**, i.e. a haven that makes a lasting difference for local wildlife, with no change of current practice. Choestoe Falls RV Park met all necessary elements:

**Food.** Native plants that provide food eaten by a variety of wildlife. Feeders supplement natural food sources.

**Water.** All animals need water to survive and some need it for bathing or breeding as well.

**Cover:** Places where animals take shelter from bad weather and hide from predators or hunt for prey.

**Places to Raise Young:** Resources allowing wildlife to reproduce, protect and nourish their young.

**Sustainable Practices:** Yards and gardens maintained in natural ways to ensure soil, air, and water stay healthy and clean.

**How Wildlife Habitats Help?** Wildlife are losing habitats with rapid, large-scale changes to land and water. Habitat gardens help revitalize resources for key wildlife such as bees, butterflies, birds, and amphibians.
